

Internet Protection

More and more mobile devices are appearing at home: laptops, smartphones, tablets, connected objects

All this equipment needs the internet 24/7.

Why should you protect your internet?

- Home office work
- Access to your NAS (personal storage)
- Streaming/VOD available 24/7 (e.g. Netflix)
- Home automation: keep your home under control (e.g. connected thermostat)
- Monitor your home with video protection
- Remote health monitoring

More and more applications demand an uninterrupted internet connection. This is why your internet gateway must be protected against power outages and lightning strikes.

Eaton Ellipse ECO UPS is the best solution for you to keep your internet operating during a power failure. The Ellipse ECO also provides high-performance protection against damaging surges (IEC 61643-1 compliant).

Its extra-flat design makes it easy to install by your internet router: installation options include a vertical box format, horizontal format for under your router, or wall-mounted (optional kit).

Ensure peace of mind with an unlimited warranty for the connected computer equipment (EU countries and Norway).

- Backup time for a router + modem + hard drive (30 W): 45 mn
- Backup time for a classical router (15 W): 70 mn

Keep the internet available 24/7 with Eaton.

What to order?

Product name	Part number	Outlet type
Eaton Ellipse ECO 500 FR	EL500FR	French outlets
Eaton Ellipse ECO 500 DIN	EL500DIN	DIN (Schuko) outlets
